History Prior to January 17, 1997, the AutoCAD product line consisted of titles that made up the "Building and Construction group". The titles were CAD AutoCAD, Drafting & Design, Utilities, Architecture & Interiors, Mechanical, Graphics and Geospatial. AutoCAD version 2000 for Windows became the first version of AutoCAD released on the Windows platform. AutoCAD LT (the entry-level AutoCAD product) was released in 1998, followed by the Architectural Desktop and Mechanical Desktop in 1999, which were amalgamations of the earlier products. In 2001, the Windows AutoCAD development team moved to a new location called "AutoCAD-Land" in Medina, Washington, near the headquarters of Computer Applications Inc. at the time. In 2002, Microsoft Corp. took AutoCAD private and the development team moved to a location in the Microsoft Seattle office. With the release of AutoCAD 2004, a new look and feel was introduced. The first version of AutoCAD, Autodesk AutoCAD LT was renamed to Autodesk AutoCAD. The name AutoCAD was used for the product, although not all products had that name. The releases for 2006 were numbered as AutoCAD 2006, with a built-in Microsoft SQL Server database, and a new, updated user interface. In 2007, AutoCAD was completely re-
